

# Design Engineering's index for 1967

## Assembly

Structural adhesives improve products and reduce costs	Jan p51
What's new in fasteners	Jan p61
Mounting bolts—types and applications	Mar p38
O-rings assembled by unique machine	Mar p41
The strength is in the skeleton	Apr p76
Designing for silver alloy brazing	Apr p80
Joint design for hollow rectangular sections	Apr p86
Metric conversion in the design office	June p60
Assembly machine uses fluidics parts sensing	Aug p40

## Drawing office

Vertical filing saves drawings and dollars	Feb p48
Moments of inertia solved by graphics	Feb p52
What's ahead for engineering graphics?	Feb p62
Drawing office equipment and supplies directory	Feb p65
Photography can extend or compress time	Apr p52
Metric conversion in the design office	Jun p60
Root mean squares should join the AAs	Jun p64
New symbols cross language barriers	Jul p78
Shaft design for infinite fatigue life	Oct p86
Computer program generates masks for integrated circuitry	Nov p65

## Electrical & Electronic

Control of electrical drives systems—5	Jan p56
Basic guide to limit switches	Jan p58
Cable cars ride the high voltage wires	Feb p50
Control of electrical drive systems—6	Feb p56
A basic guide to proximity switches	Feb p62
Control of electrical drive systems—7	Mar p47
What's new in gearmotors	Mar p49
Control of electrical drive systems—8	Apr p55
Primer on timers—solid state, mechanical, motor driven and mercury types	Apr p60

## Back laugh

"Yes, but what have you done for us LATELY?"

Control of electrical drive systems—9	M p94
Stepping motors control angular motion	Jun p50
Controlling the Expo Express	Jun p54
Control of electrical drive systems—10	Jun p58
Control of electrical drive systems—11	Jul p90
Unique sign illuminated by photocells	Aug p49
Control of electrical drive systems—12	Aug p56
"We custom design because manufacturers lack imagination"	Nov p54
University tests engine block heaters	Nov p61
Basic guide to photoelectric controls	Nov p62

## Fluid power

Liquid beads give memory to fluidic computer	Jan p46
Fluidics producer uses complex fluidic controls	Mar p36
O-rings assembled by unique machine	Mar p41
Integrated circuitry now possible with turbulence amplifiers	Mar p43
Three-way fluidics: modules, manifolds or printed circuits	Jun p44
Fluidics school teaches industrial circuitry	Jun p57
Fluidics, near-fluidics and interfaces	Jul p68
Synchronizing hydraulic cylinders	Jul p72
Fluid power buyer's guide	Jul p94
New symbols cross language barriers	Jul p78
Assembly machine uses fluidic parts sensing	Aug p40
Turbulence amplifiers popular in UK	Sep p63
Price breakthrough in wall-attachment modular fluidics	Nov p60

## Materials

Bright future seen for black chromium	Jan p49
Explosive technique bonds dissimilar metals	Jan p50
Shell molding gives low cost accuracy	Mar p44
Mix your metals to get optimum properties	May p66
Three rolls improve quality and lower cost of seamless tubing	May p68
"There's no bad plastic — just bad application"	May p70
Plastics 67—trends and developments	May p72
The strength is in the skeleton	May p76
New ABS plastics are cold formable	May p79
Ferrous die castings show great promise for mass produced parts	May p84
Joint design for hollow rectangular sections	May p86
Flame plating: a corner for coatings	Jun p63
Crash tests prove aluminum barriers	Aug p42
Zinc die castings Vs plastic moldings	Sep p56
Sintered nylon gives long life under tough wear conditions	Sep p74
Plastic bearings: when to use and how to design	Oct p77

## Mechanical power transmission

What's new in gearmotors	Mar p49
What's new in shaft couplings	Apr p69
Three rolls improve quality of seamless tubing	May p68
Windlass inspires design of mechanical power amplifier	Oct p72
Spiroid gears have many advantages in higher ratios	Oct p74
Plastic bearings: when to use and how to design	Oct p77
Solid lubricants: a growing choice of composites and coatings	Oct p80
Timing belts offer many advantages	Oct p82
Shaft design for infinite fatigue life	Oct p86
Mechanical power transmission buyers' guide	Oct p90
New principle cuts cost of torque measurement	Nov p66

## Miscellaneous

Engineers fail to influence Corporations Act	Jan p48
Ottawa computerizes geographic data	May p83
Sound fundamentals—know your noises—1	Jun p46
Sound fundamentals—know your noises—2	Jun p81
Sun turns salt water to fresh	Aug p45
Sound fundamentals—know your noises—3	Aug p52
An aerial alloy for Smoky the bear	Sep p59
Anatomy of a spacecraft	Sep p70
Automation roundup 1967	Dec p38
The best new products of 1967	Dec p57
Technical literature roundup 1967	Dec p50
